## Latest Updates

-  **SSG Version 14.0 BETA3** 01.06.2025  
L2TP termination support, extended range of cloud protocols (up to 5120 in total), fixes and improvements
-  **SSG Version 13.3 Congo** 22.04.2025  
New protocols, fixes and improvements
-  **GUI Version 2.35.4** 26.09.2024  
Connecting to equipment via SSH, redesigning the Hotspot section and its new features
-  **SSG Version 13.1 Congo** 24.06.2024  
Subscriber activity control, new service: DNS response spoofing

## Popular

-  **DPDK Interface Configuration** DPI Platform Configuration: DPDK Interface Setup, Packet Processing Parameters, and Memory and Processor Management. Commands for Managing and Verifying DPI Configuration, Supported Protocols, and Network Optimization Methods
-  **Hardware Requirements and Performance** Hardware Requirements: Functional Capabilities, Architectural Requirements, and Performance Standards Necessary for Effective Traffic Analysis. Virtual Machine Requirements
-  **DPI Use Cases** Examples of uplink channel optimization, setting up tariff plans and Captive Portal, identifying Wi-Fi users via mobile devices, and managing categorized lists
-  **VEOS Installation and Configuration** VEOS operating system installation process. Preparation of the installation media and step-by-step instructions for installation and basic system setup

## Product Information

## DPI

Multi-functional platform for traffic management [Go to section](#)

## BRAS

Flexible and scalable software solution [Go to section](#)

## CG-NAT

Transparent network address translation on standard x86 servers [Go to section](#)

## QoE

Collecting statistics, assessing network health and service quality [Go to section](#)

## VEOS

Operating system [Go to section](#)

New EPDG

Solution for launching Wi-Fi  
Calling (VoWiFi) [Go to section](#)
