# Uninstall (complete removal)

Attention! Uninstalling will completely delete your data!

In some cases, it is necessary to completely remove the dpiui2 graphical interface (for example, if the product was installed on a test DPI or on another server by mistake).

For complete removal, run the uninstall script [dpiui2-rpm\\_uninstall.sh](#).

```
source <(curl https://vasexperts.ru/install/dpiui2-rpm_uninstall.sh)
```

The package will be removed: dpiui2. And also complete data deletion!
