# QoE analytics

Do not forget to configure connection to [QoE Stor](#).

The main section is divided into several subsections for ease of use.

- [QoE Dashboard](#)
- [QoE NetFlow](#)
- [QoE Clickstream](#)
- [QoE Subscribers](#)
- [QoE Triggers & Notifications](#)
- [QoE Administrator](#)
- [QoE NAT Flow](#)

Sections above contain lists of reports (tabular and graphical) and filters. Each report allows data analysis in various forms.

Keyboard arrow control is available in reports and filters.

Also added hotkeys for working with reports and filters. The full list can be viewed by clicking the Help button in the Filters window:

The screenshot displays the 'Filters' window in the QoE analytics application. The window has a 'Saved' tab and a 'History' tab. Below the tabs is a search bar labeled 'Filter'. The main area contains a table with columns for 'Filter', 'Operator', and 'Value'. The table lists several filters, each with a checkbox, a status indicator (e.g., 'Off'), and a name. A help menu is open over the table, listing various keyboard shortcuts and their functions. The 'Help' button in the bottom left corner of the window is highlighted with a red box.

Filter	Operator	Value
<input type="checkbox"/> Off Host	like	
<input type="checkbox"/> Off Subscriber	like	
<input type="checkbox"/> Off Login	like	
<input type="checkbox"/> Off Host IP	like	
<input type="checkbox"/> Off Protocol	like	

- Ctrl+Shift+f Show/Hide filter settings
- Enter Apply filter
