# Performance

To go to the Performance section, open the "DPI CONTROL" menu and click on the "Performance".

The section contains 2 subsections:

- [Online](#) - the current state in real time is displayed
- [Statistics](#) - the accumulated statistics for the period are displayed

## Online

This section shows the current state of DPI performance in real time.

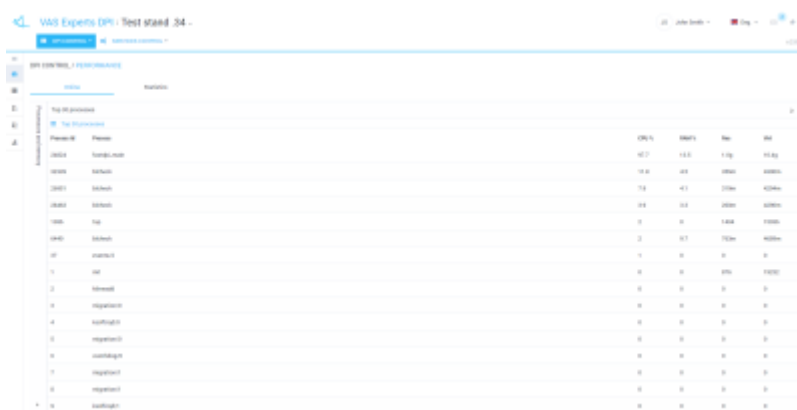

It is possible to switch between 2 tabs:

- [Processors and memory](#) - Processors and memory usage are displayed
- [Top 30 processes](#) - TOP 30 processes list is displayed
