Configuration of the SWU Interface

Section "fast-epdg.swu.<connection-name>"

Parameter	Description	Value
apn	Served APN	ims
leftsubnet	Network serviced by the server	IPv4: x.x.x.x/m, where x — a decimal number from 0 to 255, m — the subnet mask, a decimal number from 0 to 32 IPv6: y:y:y:y:y:y:y:y/n, where y — a hexadecimal number from 0000 to FFFF, n — the subnet mask, a decimal number from 0 to 128

Template:

```
fast-epdg {  
    swu {  
        <config-name> {  
            apn=  
            leftsubnet=  
        }  
    }  
}
```

Example:

```
fast-epdg {  
    swu {  
        <config-name> {  
            apn=ims  
            leftsubnet=10.0.0.0/8  
        }  
    }  
}
```
